Technical Manual Technology and Sailor Training Panel

Corporate Overview

TM data and training data is an important combination of Navy assets to enable sailor performance. From a corporate point of view, how is NAVSEA currently organized so that TM data expertise and training data expertise are brought together as productive working partners?

TMMAs Facing Technology Issues

TMMAs face policy and life cycle issues everyday. But of late, TMMAs must understand XML, SGML, internet technologies, and especially, “shared data environments.” What does "shared data", or "re-usable data", really mean to the TMMA?

TMMAs Facing Technology Issues, follow on…

How should a TMMA implement the “reusable” concepts?

Given the enormous costs associated with conversion of data, at what point do you move into a shared data environment (i.e. why should I do this)?

The Relationship Between Tech Data and Training Data

How is Tech Data and Training Data related? Are they the same, different, or somewhere in between?

Is there a difference between re-using data for training and sharing data for training?
